

Oil PULLING

(The Oil Natural Healing Treatment of Dr. Karach)

Dr. Med. Karach spoke about a remarkable treatment at a conference of the All Ukransiche-Union of the Oncologists (Specialists for Tumor diseases) and Bacteriologists, a part of the Academy of Sciences of UDSSR, He talked about a super simple Healing process for the human body by using coconut oil or sunflower oil.

The results of this healing process, causes astonishment and doubts, but by experimenting with the oil therapy everybody can see the results in his own body and can get convinced for him that these arguments are right.

It is more than surprising that with this totally harmless, biological healing method one could achieve such success and healing results. They are really without comparison. Most illnesses could be totally cured by this simple method and it was unnecessary, to use surgery or all kinds of medicines with their so much harmful side effects.

The real important thing of this method is in its simplicity; it is just sipping or sucking oil inside the mouth. The further healing process then is done alone by the human organism.

In this way it is possible to heal all at once-cells, tissues and all other organs because of the destruction of the natural mouth germs and with this the destruction of the human organism is stopped. Right now, the balance is not there and causes illness and in the last consequence it affects the duration of life. Man lives only half the time which he could live.

The Oil-therapy heals totally headaches, bronchitis, tooth pain, thrombosis, eczema, ulcers, intestinal diseases, heart and kidney diseases, encephalitis and woman's diseases.

Preventively the growth of malignant tumors is cut and healed.

Chronic blood diseases, paralysis, diseases of nerves, stomach, lungs and liver and sleeplessness are cured. Therefore, as Dr. Karach says, it is possible to heal many diseases, also those caused by poisonous chemical parts of drugs.

Dr. Karach says, his method heals the whole organism all together, also preventively. This especially is important in cases of tumors and of heart attacks. Dr. Karach: "With the oil therapy I have cured my chronic blood disease; I have suffered for 15 years. It also healed in three days an acute arthrosis which made me even lay in bed. The healing process: Get coconut, sunflower or sesame seed oil. In the morning before breakfast you take one tablespoon of the oil – but do not swallow it. Without great effort or speed, you wash and suck the oil inside the mouth, pull it through the teeth and all that with closed mouth for 15 to 20 minutes. You really chew, move your chin and (like in the Mayor diet) a lot of saliva is drawn; that means mouth – digestion. Obviously, the poisons are drawn from the blood through the mucous membrane of the mouth. That is why, in no case, the oil should be swallowed because it has become poisonous. First, the oil is viscous, but more and more it becomes liquid thin and white like wool. Then you spit it out. (As long as the liquid is still yellow you did not work with the oil long enough)

After spitting the oil, the mouth has to be washed intensely with water several times and the teeth need to be cleansed with brush; also the sink, because the liquid contains big amounts of bacteria and harmful material.

If we would look at a drop of this liquid through a microscope, we would see all kind of moving

fibers – those are microbes in the first stage of their growth. Pulling Oil pulls out disease elements from the system (body) and restores health. It is important to say that during Oil-pulling, our metabolism is increased much and that is why the body remains in a persistent healthy state.

One of the obvious results is the fixing of loosened teeth, the stop of bleeding teeth flesh and whitening of the teeth. The best time for the oil pulling is in the *morning before breakfast*. To enhance the healing process, you can repeat the treatment three times a day, but always before meal and with empty stomach. The organism will not be disturbed by this and the healing is quicker and stronger.

How long? Do till the original strength, freshness and a calm sleep is back again. After awakening in the morning you should feel refreshed and you should not have black circles under your eyes. A good appetite, a good sleep and a good remembrance (thinking) should be there.

In the beginning worsening for patients who are suffering from more than one disease, it is possible that there is a worsening of their situation. It is even possible that during the cure one infectious region of the body influences another one, which may be, would have become later even a killing disease. Do not stop when your state gets worse: says Dr. Karach. There is no reason to interrupt the treatment even when the body temperature gets higher (it is healing temperature). Mainly when these signs are there, you should go on without interruption. If you interrupt you should know, that the healing only is there during the time of oil pulling. I point out says Dr. Karach, that a worsening of your health state is a sign that your disease is disappearing.

How often? This question only the patient himself can answer who is in the healing process. If he needs more or less depends on how he feels. Acute diseases will be cured very quickly in two to four days. Chronic diseases normally need more time, sometimes even one-year. So please don't give-up.

1 The above article was published in Journal of World Teletherapy association (APR – JUN 1992 issue) from Calcutta. The editor of the journal has added at the end of the article: "I received copy the above lecture which was delivered at Indian Senior Citizens Association, HOUSTON, U.S.A on 9th Nov 1991.

2 This article was published in a German magazine, "Fortschritt fur alle" Nr. 46, Erika Herbst, Schlossweg 2, 8501, Feucht Bavaria, Germany.

Oil Pulling Method Summary:

Step1:

First thing in the morning on an empty stomach and before drinking any liquids (including water), pour exactly one tablespoon of coconut oil or sesame oil into your mouth.

Step 2:

Swish the oil around in your mouth without swallowing it. Move it around in your mouth and through your teeth, as if it was mouthwash (don't tilt your head back to gargle though). You'll find that the oil will start to get watery as your saliva mixes with it. Keep swishing. If your jaw muscles get sore while swishing, you're putting too much into it. Relax your jaw muscles and use your tongue to help move the liquid around the inside of your mouth. When you do this correctly, you'll feel very comfortable. Pretty soon, it will become second nature.

Step3:

As the end of the oil pulling session approaches, you may notice the oil/saliva mixture in your mouth has become thicker. This is quite normal, since it is pulling out toxins from your body. When 20 minutes is up, spit out the oil into the toilet. Don't be alarmed if it looks yellowish--this is also normal.

Step 4:

Rinse out your mouth a couple of times with warm salt water and spit into the toilet. Rinse and spit with a good mouthwash. I prefer to dilute with water (or use full strength), regular hydrogen peroxide and I rinse and spit with that. The hydrogen peroxide is very effective in rinsing out any toxins which may be left in the mouth.

Oil Pulling for a Brighter Smile and Better Health

by Bruce Fife

“That sounds ridiculous,” exclaimed Rick in disbelief. “It will never work. How could it? It doesn't make any sense.” Rick suffered from chronic sinusitis. At night when lying down, his nose would stop up, making it difficult for him to breathe and to sleep. The congestion also caused him to experience frequent headaches.

The therapy I was telling him about was *oil pulling*. Although oil pulling has its origins in Ayurvedic medicine, which dates back thousands of years, this modern version is relatively new, at least in the United States. Oil pulling is very simple. Basically all you do is rinse your mouth out with vegetable oil, much like you would with a mouthwash. As simple as it sounds, if done correctly it has a very powerful cleansing and healing affect not only on the mouth and sinuses, but the entire body.

A few days later, Rick called me on the phone. “Wow! This oil pulling stuff really works,” he exclaimed. “My sinuses began to drain immediately. I expelled a lot of dark yellow, gross looking mucous. I'm breathing easier and sleeping better and my headaches are gone!”

I wasn't surprised with Rick's success. I hear many similar responses from others with various health problems. “I was skeptical at first,” says Cynthia. “I couldn't see how swishing oil in my mouth could help with my arthritis. After eight days I noticed the pain in my hands diminished considerably. There was also marked improvement in my neck and I could move my head from side to side without any pain. I was amazed at how quickly I got results. I haven't felt this good in along time!”

Some people think I'm crazy when I tell them that oil pulling can help those with asthma, allergies, chronic fatigue, diabetes, migraine headaches, PMS, and chronic skin problems. Oil pulling works by detoxifying or cleansing the body. In this way, disease promoting toxins are removed, thus allowing the body to heal itself. As a consequence, health problems of all types improve.

“I've suffered for several years with joint and lower back pain,” says Anna. “Every morning it was difficult getting out of bed because the pain. After two months of oil pulling the pain is all but gone. I'm amazed. Although I began oil pulling to relieve the joint pain, a few other things happened that I didn't expect. I'm surprised to see that the eczema on my arm and hand disappearing and my skin becoming smoother and softer. Nothing I had tried before had helped. I sleep better at night too, so I have more energy during the day. I no longer need my mid-day naps. I have so much energy I almost feel like a teenager again. My periods have become more regular with less cramping and less mood swings. Also, my teeth, gums, and tongue are cleaner than they've ever been.”

The first thing that most people notice when they start oil pulling is an improvement in their oral health. Teeth become whiter, breath becomes fresher, and the tongue and gums take on a healthy pink color. Even problems such as bleeding gums, tooth decay, and gum disease are greatly diminished or completely healed.

“I had a really bad infection in my mouth,” says Brittany. “It was so painful that I could not sleep. Pain medication helped temporarily. I was sure that I needed another root canal. After hearing about oil pulling I decided to give it a try before going to the dentist. I began oil pulling three times a day. By the very next day the pain was gone! No soreness, nothing. I was shocked. I continue to oil pull and my teeth are whiter and healthier looking than they have ever been. My gums have stopped bleeding, they used to bleed after every brushing. They are no longer receding and my teeth feel tighter. On my last visit to the dentist he was amazed at how much better my teeth and gums looked. He told me to continue to do whatever I was doing.”

Oil pulling traces its roots to *oil gargling* practiced in Ayurvedic medicine. Oil pulling as we know it today, was introduced in 1992 by Dr. F. Karach, MD. Dr. Karach claimed that oil pulling could cure a variety of illnesses ranging from heart disease and digestive troubles to hormonal disorders. He said it cured him of a chronic blood disorder of 15 years duration and within three days it cured his arthritis, which at times was so painful he was bed ridden. He used the method in his medical practice with great success.

Dr. Karach’s method of oil pulling consists of swishing, not gargling, vegetable oil in the mouth. The oil is “worked” in the mouth by pushing, pulling, and drawing it through the teeth for a period of 15 to 20 minutes. It is done one to three times a day on an empty stomach. The best time is in the morning before eating breakfast, but can be done before any meal. The used oil is discarded and the mouth rinsed out with water. The oil is never swallowed because it is loaded with bacteria, toxins, pus, and mucus.

Sunflower and sesame seed oils are the most commonly used for oil pulling, but any vegetable oil will work. People have had success with olive, coconut, almond, and other oils. I prefer to use coconut oil because of its many health benefits. If you use a mild flavored coconut oil it is very pleasant in the mouth. Some oils, such as extra virgin olive oil, are so strong flavored that many people find them difficult to use.

The oil acts like a cleanser. When you put it in your mouth and work it around your teeth and gums it “pulls” out bacteria and other debris. It acts much like the oil you put in your car engine. The oil picks up dirt and grime. When you drain the oil, it pulls out the dirt and grime with it, leaving the engine relatively clean. Consequently, the engine runs smoother and lasts longer. Likewise, when we expel harmful substances from our bodies our health is improved and we run smoother and last longer.

As simple as it is, oil pulling has a very powerful detoxifying effect. Our mouths are the home to billions of bacteria, viruses, fungi and other parasites and their toxins. Candida and Streptococcus are common residents in our mouths. It is these types of germs and their toxic waste products that cause gum disease and tooth decay and contribute to many other health problems including arthritis and heart disease. Our immune system is constantly fighting these troublemakers. If our immune system becomes overloaded or burdened by excessive stress, poor diet, environmental toxins and such, these organisms can spread throughout the body causing secondary infections and chronic inflammation, leading to any number of health problems.

Oil pulling is one of the most remarkable methods of detoxification and healing I have ever experienced in my career as a naturopathic physician. It helped me overcome a chronic skin problem that other forms of detoxification, including numerous juice fasts lasting up to 30 days, were unable to cure.

Oil pulling can work its magic almost instantly. Some people report relief from certain conditions after doing it only once. Minor problems often clear up within a few days. More serious, chronic problems may require a few weeks or several months or more depending on lifestyle issues.

Toxins are pulled from the body the very first time you try it. One of the first cleansing symptoms you will experience is an increased flow of mucous from your throat and sinuses. Mucous drainage is one of the body's methods of removing toxins. While you are pulling, mucous may build in the back of your throat. You may even have to expel the oil and clear the mucous from your throat before reaching a full 20 minutes. That's okay, take another spoonful of oil and continue until you've pulled for a total of 15-20 minutes. You may also experience a little nausea and perhaps even need to vomit as your body expels toxic waste. Other symptoms may also arise temporarily. These symptoms will subside as your body becomes cleaner and you become more comfortable with oil pulling. Unlike other methods of detoxification that last for only a short time, oil pulling should become a regular part of your daily schedule, like brushing your teeth.

Oil pulling is incredibly effective in brightening teeth, healing gums, preventing bad breath, quenching inflammation, and healing oral infections. It is also effective in treating many systemic conditions throughout the body.

As good as it is, the simple oil pulling method described in this article isn't always enough. Some people and some conditions require a little extra care. For this reason, I took oil pulling and developed it into a more complete, more effective method that I call Oil Pulling Therapy. This program incorporates medicated coconut oil (which you can make yourself), diet, select nutrients, oral pH balancing procedures, and, for those who have amalgam (mercury) fillings or metal crowns, a detox procedure designed specifically for removing heavy metals, all of which combine to greatly enhance the effects and healing properties of oil pulling. The details of this program are covered in my new book *Oil Pulling Therapy: Detoxifying and Healing the Body Through Oral Cleansing*.

Oil pulling is cheap; the only expense is for the oil you use. It is very easy; you simply swish oil in your mouth. Compared to other forms of detoxification it is relatively effortless. It doesn't require dieting, fasting, or consuming unpleasant, and often bowel loosening, mixes of herbs and pills. And it is completely harmless. All you are doing is rinsing your mouth out with vegetable oil—a food. You're not even swallowing the oil. What can be more benign than that? Nearly anyone can do it, regardless of their level of health. If you have health issues, don't let the simplicity of oil pulling detour you from trying it. Sometimes the simplest procedures produce the greatest results.
